Cluster

Cluster: LGCA affiliates (09/2018)

Mission: LGCA as a technical partner of Lombardy Region to...

- define a **regional policy** aimed at **supporting and promoting innovation** in the Green Chemistry sector
- support Lombardy Region for **Smart Specialisation Strategy** optimization
- support the regional participation in international initiatives (**Vanguard – EUSALP**)

Mission: networking with regional Green Chemistry/Bioeconomy stakeholders is pivotal to...

- answer the impelling challenges deriving from the current transition towards a **bioeconomy-based system**
- develop basic and applied research aimed at speeding up the **innovation process** on a **sustainable** ground
- get back on the path to **growth** and **jobs**

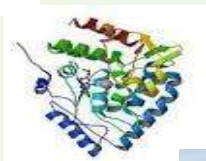

Activities (1/2)

- Developing **new technologies** and **processes** addressing the goals of bioeconomy
- Developing **markets** and **competitiveness** in bioeconomy sectors
- Promoting **policymakers** and **stakeholders** to work more closely together

Bio-based chemistry - Industrial biotechnology

Biocatalysis

Energy & Biorefineries

Environment

■ *Activities (2/2)*

- "Catalyzing" **collaborations and synergies** among all the actors of the green chemistry and bioeconomy sector through:
 - the participation in national/international meetings;
 - the organization of thematic events;
 - the endorsement and support to LGCA affiliates (projects, call applications);
 - flagship projects.

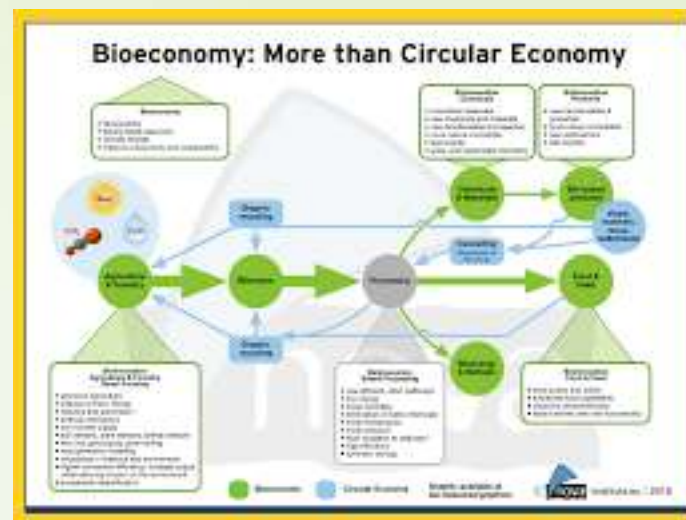

Main Goals

- Technological solutions

- Networking

- Share informations

Partnership
